Claims 5-10 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Kamiya et al (EP 1082907).

Kamiya et al teach a process for treating milk and milk products comprising decreasing the dissolved oxygen concentration by treatment with nitrogen gas to reduce the dissolved oxygen concentration to 2 ppm or less and heat treating to sterilize as is claimed (see entire document, especially claims 1, 2, and 4).
